shuyuan.dev · github.com/SHUSHU010829

SUMMARY

Full-stack engineer with 3+ years shipping production FinTech end-to-end. Built two 0-to-1 SaaS platforms at Relianz (Easytax + business registration) now serving 100+ enterprise subscribers and 500+ SMB clients. Stack: React, TypeScript, Next.js, Go. Owns features from schema design and API contracts to interaction detail and E2E tests.

SKILLS

Frontend	React, Next.js, TypeScript, Tailwind CSS, Framer Motion, React Native
Backend	Go, Node.js, PostgreSQL, RESTful API, SSE
Testing & AI	Playwright, Vitest, Jest, Claude Code, Spec-Driven Development (SDD), Apidog
Tools	Git, Figma, Vercel, Google Cloud, PM2, Ubuntu
Languages	Mandarin (native), English (conversational)

EXPERIENCE

Relianz 友信創新 — Frontend Engineer

Sep 2023 – Present

FinTech SaaS platforms for business registration and cloud accounting (Easytax)

- Built two SaaS products from 0 to 1 alongside matching admin back-offices, then became sole frontend owner after the first year — now serving 100+ enterprise Easytax subscribers and 500+ business registration clients
- Designed and built a precision tax calculation engine for voucher logging, salary slips, and labor payment forms feeding downstream tax filings
- Delivered full-stack subscription payment flow with Go + ECPay, turning Easytax into a recurring-revenue product
- Introduced a Spec-Driven Development workflow with Claude Code, incrementally refactoring legacy code into a layered architecture (Logic / Validation / UI / Service) during feature work
- Established E2E testing with Playwright and bilingual component documentation, adopted as team standards

DailyVal — Frontend Contractor

Oct 2025 – Present

Web presence for DailyVal, a Valorant community iOS app with 1M+ downloads

- Designed and shipped social.dailyval.com end-to-end, extending the native iOS community to the web via Apple CloudKit as the backend of record
- Following the launch, was trusted to take over the main dailyval.com marketing site and rebuild it from the ground up
- Implemented i18n multi-language support, infinite scroll, and system-synced dark mode as the sole web engineer on both properties

SoftMobile Technology 精誠隨想 — Frontend Intern

Jul 2022 – Aug 2023

- Revamped account management and testing systems; built cross-platform mobile apps with React Native serving Android and iOS from a shared codebase
- Managed application state with Redux and React Hooks; integrated RESTful APIs across web and mobile clients

EDUCATION

Feng Chia University — B.S. in Engineering and Computer Science

Sep 2019 – Jun 2023

- GPA: 4.1 / 4.3
- Vice Director of iOSClub — ran weekly workshops teaching Swift Playgrounds and SwiftUI fundamentals
- Teaching Assistant, iOS App Programming course (Sep 2021 – Dec 2021)
