EXPERIENCE

Relianz 友信創新 — Frontend Engineer
Sep 2023 – Present

FinTech SaaS platforms for business registration and cloud accounting (Easytax)

- Built two SaaS products from 0 to 1 alongside matching admin back-offices, then became sole frontend owner after the first year — now serving 100+ enterprise Easytax subscribers and 500+ business registration clients
- Designed and built a precision tax calculation engine for voucher logging, salary slips, and labor payment forms feeding downstream tax filings
- Delivered full-stack subscription payment flow with Go + ECPay, turning Easytax into a recurring-revenue product
- Introduced a Spec-Driven Development workflow with Claude Code, incrementally refactoring legacy code into a layered architecture (Logic / Validation / UI / Service) during feature work
- Established E2E testing with Playwright and bilingual component documentation, adopted as team standards

DailyVal — Frontend Contractor
Oct 2025 – Present

Web presence for DailyVal, a Valorant community iOS app with 1M+ downloads

- Designed and shipped social.dailyval.com end-to-end, extending the native iOS community to the web via Apple CloudKit as the backend of record
- Following the launch, was trusted to take over the main dailyval.com marketing site and rebuild it from the ground up
- Implemented i18n multi-language support, infinite scroll, and system-synced dark mode as the sole web engineer on both properties

SoftMobile Technology 精誠隨想 — Frontend Intern
Jul 2022 – Aug 2023

- Revamped account management and testing systems; built cross-platform mobile apps with React Native serving Android and iOS from a shared codebase
- Managed application state with Redux and React Hooks; integrated RESTful APIs across web and mobile clients
